**16 Patient Gown (Sterile & Non-Sterile)**

**17 Surgeon Gown (Sterile & Non-Sterile)**

# Absorbent Gauze

Absorbent gauze is a lightweight, woven cotton fabric with an open texture designed for high absorbency. It is one of the most widely used materials in medical and surgical dressings. The fabric is bleached, purified, and rendered free from impurities to ensure safety and effectiveness in clinical use.

## Available Quality:

27 TPI, 40 TPI, 34 TPI, 42 TPI, 50 TPI, 60 TPI, FII GAUZE & Custom Quality

## Available Size:

Width: 90 CM, 100 CM, 120 CM & Custom Width  
Length: 10 Meters to 90 Meters & 10 Yards to 90 Yards

# Bandage Cloth

Bandage cloth is a soft, breathable, and stretchable woven fabric used primarily for medical and surgical purposes. It is generally made from cotton, which provide absorbency, comfort, and skin-friendliness. The cloth is specially designed to be lightweight, porous, and flexible, allowing it to conform easily to different parts of the body. It is used in Covering and protecting wounds, holding dressings or splints in place, providing compression to reduce swelling, Supporting injured joints or muscles.

**Available Quality:**

**56 TPI**

**Available Size:**

**Length: 10 Meter or 20 Meter**

# Gauze Swabs

Gauze Swabs are small, square pieces of woven cotton fabric used in medical and surgical procedures. They are soft, highly absorbent, and designed to clean wounds, absorb blood or exudates, and protect injuries from infection. Gauze swabs may be sterile (used for direct wound contact or in surgical procedures) or non-sterile (used for general cleaning and dressing applications).

## Available Quality:

Type-13 & Type-17

### No. of Ply:

8, 12, 16

### Folding Type:

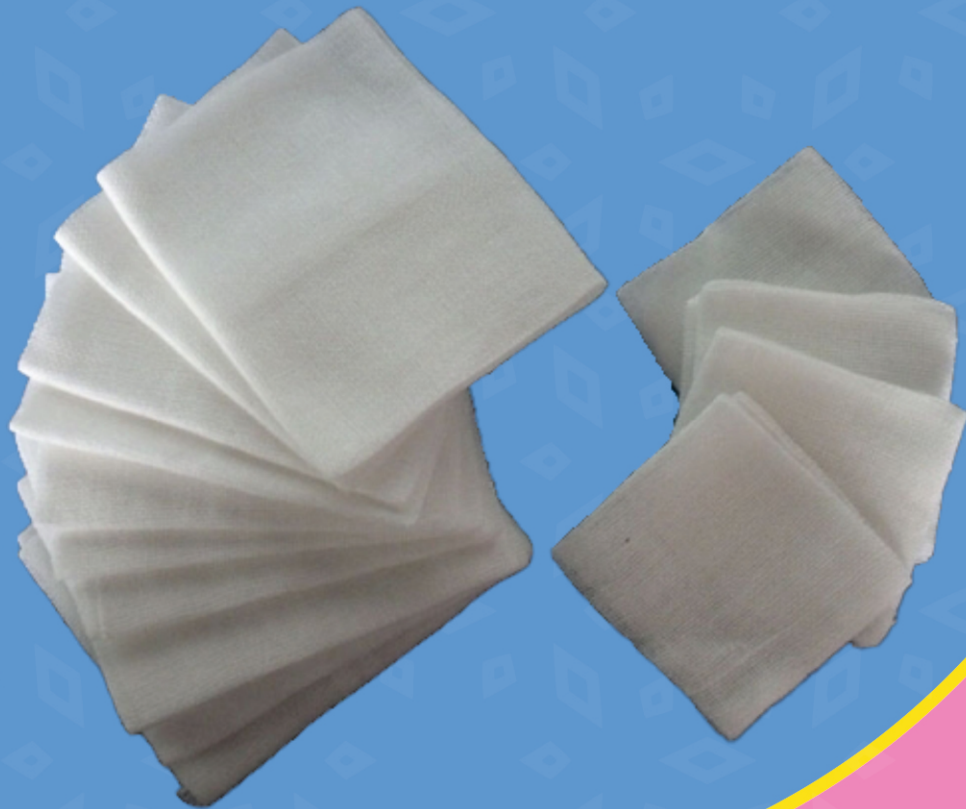

French & American

### X-Ray Thread:

With or Without X-RAY  
Detectable Thread.

### Sterility:

Sterile & Non-Sterile

### Available Size:

5 CM X 5 CM, 7.5 CM X 7.5 CM, 10 CM X 10 CM

# Roller Bandage

A roller bandage is a long strip of gauze or bandage fabric that is tightly rolled and used in medical care for supporting, dressing over wounds, securing, to apply pressure and control bleeding, to support sprains, strains or fractures, to immobilize joints or body parts, to reduce swelling by compressing. It is one of the most common types of bandages used in first aid and clinical settings.

## Available Quality:

34 TPI, 42 TPI, 50 TPI, 60 TPI,  
FII Bandage, Custom Quality

## Packing:

10 Roll or 12 Roll

## Available Length:

3 Meter to 15 Meter, 3 Yards to 15 Yards

## Available WIDTH:

15 CM, 10 CM, 7.5 CM, 5 CM, Custom Width

4 BHARATHI SURGICALS

# Jumbo Roll Bleached Starched or Unstarched

A starched jumbo roll is a large roll of fabric, usually cotton or gauze, that has been stiffened by treating it with starch. Starching gives the fabric extra firmness, shape, and strength, which helps it maintain rigidity and smoothness when used. It is mainly used for prepare of roller bandage, can also be used in textile industries for reinforcement and finishing purposes. Unstarched jumbo Roll is a large-sized roll of absorbent cotton gauze that has been thoroughly bleached to achieve a clean white appearance, free from natural impurities and contaminants. This material is highly suitable for medical and surgical applications. The jumbo roll is cut into desired lengths or sizes for use in hospitals, clinics, and dressing material production. It is commonly used in making bandages, swabs and dressings.

## Available Length:

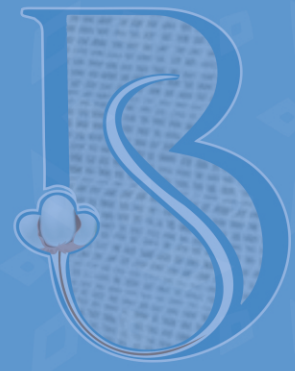

500 to 1000 Meters / Roll  
depending upon TPI.

## Available Width:

100 CM, 120 CM and custom width.

# Dressing Pad

Dressing pads are sterile, absorbent medical products designed to cover and protect wounds from infection, dirt, and further injury. They are made from soft, non-woven or woven cotton gauze material with high absorbency to manage wound exudate effectively. These pads provide a protective barrier while allowing the wound to breathe, promoting faster healing. They are widely used in hospitals, clinics, and first aid applications for surgical wounds, cuts, abrasions, burns, and other injuries. Dressing pads are available in various sizes, individually packed to maintain sterility, non-sterile also available.

## Sterility:

Sterile or non-sterile.

## Available Size:

10 CM X 10 CM, 10 CM X 20 CM, 15 CM X 20 CM

# Gamjee Roll

A Gamjee Roll is a soft surgical dressing material made of absorbent cotton wrapped in a cotton gauze covering or non-woven. It is primarily used in hospitals, clinics, and first-aid applications for wound dressing and padding purposes. It is used for Dressing for burns, cuts, and major injuries. Orthopaedic use to provide cushioning under plaster casts. It is also used in Post-operative wound care. It is used in Padding under compression bandages.

### Length

2 Meter, 3 Meter and custom length.

### Sterility:

Sterile or non-sterile.

### Available Width:

15 CM, 10 CM and custom width.

# Gauze Sponge

A gauze sponge is a small, square or rectangular piece of medical-grade woven cotton gauze, commonly used in surgical, medical, and wound care procedures. It is soft, highly absorbent, and designed to effectively soak up blood, exudates, or other body fluids. Gauze sponges are available in sterile and non-sterile forms, with varying ply (layers) and mesh sizes to suit different medical applications. They are used for cleaning wounds, absorbing fluids, cushioning and protecting injury sites, and assisting during surgical operations. Sterile gauze sponges are packed individually or in sets for use in surgeries and wound dressing, while non-sterile types are typically used for general cleaning and padding.

## No. of Ply:

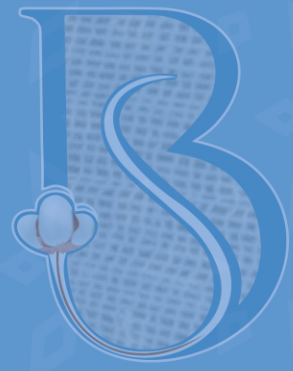

8, 12

## Sterility:

Sterile & Non-Sterile

## Available Size:

30 CM X 30 CM, 20 CM X 20 CM,  
25 CM X 25 CM, 25 CM X 40 CM  
and custom size.

## Cotton Balls

Cotton Balls are small, soft, fluffy balls made from 100% pure cotton. They are gentle, highly absorbent, and non-irritating, making them ideal for medical, cosmetic, and personal care use. In healthcare, they are commonly used for cleaning wounds, applying antiseptics, and absorbing blood or other fluids during medical procedures. In personal care, they are used for makeup removal, nail polish removal, and general cleansing. Their soft texture ensures comfort, while their natural cotton composition provides safety and hygiene.

## Gauze Balls

Gauze balls are small, round-shaped sterile or non-sterile dressings made from high-quality absorbent cotton gauze. They are soft, lightweight, and designed to provide gentle absorption and cushioning during medical and surgical procedures. Commonly used in hospitals, clinics, and first-aid care, gauze balls are ideal for wound cleaning, blood absorption, and applying antiseptics.

**Available weight:**

½ Gram and 1 Gram.

## Triangular Bandage:

A triangular bandage is a large piece of cloth cut in the shape of a right-angled triangle, usually made from cotton. It is a versatile first aid dressing tool widely used in medical care, emergency situations, and surgical dressing kits. It is used as a sling to support and immobilize injured arms, wrists, or shoulders. It is used for securing splints in fractures.

### Available Size:

100 to 130 CM base and  
90–100 CM sides, but it may vary.

## Absorbent Cotton:

Absorbent cotton is a type of cotton that has been specially processed to enhance its absorbent qualities. It is typically used in medical, cosmetic, and industrial applications. The cotton fibres are purified to remove impurities, making it highly absorbent and sterile, which is especially important in medical settings.

### Available Weight:

300 Grams Net / 400 Grams Gross

10 BHARATHI SURGICALS

## Pre-Operative Kit:

A Pre-Operative Kit is a collection of essential items provided to a patient prior to undergoing a surgical procedure.

### Content:

Patient Gown – 1 Piece, Shoe cover - 1 pair,  
Bouffant cap – 1 Piece

## Disposable Bed Sheet & Pillow Cover

Disposable Bed Sheets and Pillow Covers made from SMS (Spunbond-Meltblown-Spunbond) and Non-Woven fabrics are designed for use in hospitals, clinics, and healthcare facilities to maintain hygiene and prevent cross-contamination. Used in hospitals, ICUs, operation theatres, and patient wards.

### Colour Options:

Blue

### Available Sizes:

Bed Sheet: 210 CM X 160 CM or customized  
Pillow Cover: 75 CM X 55 CM or customized

## Patient Gown

A patient gown is a disposable loose-fitting non-woven fabric worn by patients during medical examinations, treatments, or hospital stays. It is designed to provide comfort and easy access for healthcare professionals to examine or treat the patient.

**Available Sizes:**

XL

## Surgeon Gown

A surgeon gown is a disposable non-woven fabric worn by surgeons and other medical staff during surgical procedures to maintain a sterile environment and prevent the transmission of microorganisms, fluids, and contaminants.

**Available Sizes:**

XL
